

Complete Transfer

fact sheet

POWERED BY  Complete Data

Seamlessly transfer large, complex matters at any stage to Consilio's infrastructure with a trusted, custom-designed solution to meet your matter's timeline requirements.

- ▶ Consultative approach to custom design a seamless transfer of matters to Consilio infrastructure
- ▶ Reduce risk exposure, control costs, and simplify processes as matters scale
- ▶ Leverage scale and security benefits of Consilio's global investments in data infrastructure and information security
- ▶ Unlock value-added Consilio solutions under the Consilio Complete client experience

By the Numbers

300+

Terabytes of Complete Transfer Data Migrated

250+

Terabytes of Data Ingested Monthly

110+

Petabytes under Management

36K+

Exports & Productions Annually

23K+

Customer Support Requests Managed per Month

15+

Data Centers Around the World

12K+

Hosted Projects per Month

Leveraging Consilio's investments in world-class expertise, innovations in technology & data, along robust workflows can deliver significant, long-term benefits to legal teams. However, transitioning to a trusted, proven provider still carries risk and complexity when considering data volumes, complex data types, and potential active matters under tight timelines. **Complete Transfer offers clients a custom-designed and proven solution to seamlessly migrate matters, regardless of stage, to Consilio's global, enterprise-grade data processing, hosting & production infrastructure.**

One Common Goal: Minimise Risk & Cost, Ensure Quality & Consistency

From engaging us to initiate a Complete Transfer project through final testing and quality assurance checks – every project is designed to minimise risks and costs while ensuring the quality & consistency of your client experience.

The Complete Transfer Difference

- **Consultative experience** - Our proven process incorporates a consultative approach to understand your specific requirements. Our experts, experienced with complex Complete Transfer migrations, then define, propose and execute a Complete Transfer that minimises process and technical risks during a structured transition.
- **Proven secure global infrastructure investments** including specialised Complete Transfer hardware, 13+ data centers – ISO 27001/SAS 70 and/or Type 2/SSAE 16 certified and regularly audited – to accommodate privacy, regulation & cross-border data movement needs.
- **Vertically-integrated internal working group** comprised of a full stack of experts – from IT, data, and security operations engineers to project and review managers – ensuring every Complete Transfer migration is thoughtfully planned and executed.
- **Expertise with complex migration scenarios** including, but not limited to, active large regulatory matters, integration / collaboration with incumbent vendors, concurrent managed review tracks that reduce risk and cost exposure.
- **Data consistency and quality** with processes, tooling, and expertise, including over 100 processing engineers, hosting, IT & network operations specialists on staff globally.

How a Complete Transfer Migration Works

Every Complete Transfer migration is unique and specifically designed to meet client requirements. However at a high-level, Consilio's Complete Transfer solution does follow some common steps:

Solution Process

Case Study: Complete Transfer for Major Pharma / Life Sciences Company

The Issue

A major pharmaceutical / life sciences global corporation sought to leverage Consilio's Complete infrastructure; however, they were in the middle of a multi-year agreement with an incumbent vendor. Over 200+ terabytes of client's data resided in at least four environments (Relativity, NUIX, LAW, and proprietary). Together with Client, a timeline of 6 months was identified for a structured migration.

Our Approach

Working closely with the Client and Incumbent Vendor, Consilio's vertically-integrated working group closely studied, analysed, and planned resourcing. Deliverables content and timing were communicated to Client and Outside Counsel. Consilio consulted with Client and Outside Counsel to successfully resolve considerable objections posed by the Incumbent Vendor.

Consilio then positioned expertise and requisitioned specialised technology hardware assets to speed migration. Adapting to technology, process and throughput errors presented by Incumbent Vendor, Consilio continued to revise approach, QA/QC checks, and strategies against timelines – all while maintaining open and transparent communication with Client and Outside Counsel.

The Result

- Complete Transfer successfully migrated 160+ terabytes in six months, with more matters and data continuing to be migrated.
- All live projects experienced minimal downtime (1 week or less) during the transition.
- Data quality & consistency goals were achieved
