23K+

Customer Support Requests
Managed per Month

15+

Data Centers
Around the World

250+

Terabytes of Data
Ingested per Month

From the increased pressures of new data security & privacy regulations to the need to proactively manage large volumes of small matters, corporate legal departments today are being challenged more than ever. Addressing multifaceted needs requires a solid strategic footing, tactical expertise born from historically-proven approaches, and an applied knowledge of the right tools and workflows to employ at the right time.

Advisory & Transformation Solutions by Consilio Enterprise delivers proven technology-enabled transformation and advisory solutions to help legal departments solve their most pressing challenges. Consisting of one practice bringing together experts in data forensics, legal department operations, information governance, and eDiscovery processes, we start by taking a holistic, stakeholder-centric approach to understanding your current operating state, goals, and challenges. Then, our teams propose best-fit approaches, based on the experience supporting hundreds of implementations, to help your organisation move forward. Our approaches have:

- **Extended the capabilities of resource-constrained teams**
- **Aligned legal departments with internal constituencies**
- **Uncovered and implemented significant operational cost savings**
- **De-leveraged existing staff from resource-sapping, non-critical workflows to focus on core value generation**
- **Significantly reduced regulatory and financial impact on current matters while reducing long-term risk exposure**

Legal Department Consulting to Shape Modern, Efficient Workflow

- **Vendor-agnostic legal technology experts guide you** through the process of defining, selecting, designing and implementing key legal technologies.
- **Holistic, stakeholder-centric approach** works side-by-side with lawyers, corporate IT teams, consultants and technologists to successfully roll out technologies as well as educate stakeholders on the benefits of a chosen solution by:
 - *Developing and implementing communication strategies and plans*
 - *Determining ongoing support requirements, roles and responsibilities*
 - *Demonstrating return on investment*
- **Deep Expertise Accelerating Operational Efficiency** by identifying areas of overspend and providing guidance on how technology can be used to better manage external law firms and legal outsourcing providers.
- **Legal service delivery model and solutions enabled by Flexible Talent Solutions spanning enterprise counsel & secondments to administrative & support staff.** We begin with understanding existing and future business needs, align the delivery model design to optimise performance, and fulfill with key talent.
- **Best-in-class benchmarking** from over a decade of industry-wide surveys and in-house analytics solutions, like Sky Analytics, provide significant benchmarking data in addition to our superior methodology for industry-specific benchmarking that provides best-in-class comparisons beyond any other.
